

FIBERFLEX®

Desert Energy Fishing Tools are Back

Total Rod Concepts, Inc. is the new owner of the Desert Energy line of fishing tools. Widely recognized as one of the best fishing tools on the market, its slip-wedge activation holds on strong, without deformation, making it durable and reliable.

The Desert Energy line of fishing tools are currently produced for 2 3/8" and 2 7/8" tubing sizes. The slips are made in various sizes to help you catch the rod you want. The flexibility of this tool and its ease of use make this product one of the best available.

The current product lineup will catch everything from a 5/8" FH coupling to a 1.25" fiberglass sucker rod. If you have a rod part you need to recover, go fishing with the most reliable tool to help you get the job done.
